

About DALNET

The Detroit Area Library Network (DALNET), incorporated in 1985, is a consortium of libraries working together.

DALNET strives to engage in cost-effective practices to insure that members' investments are maximized while respecting local institutional values, principles, and operational priorities.

We work to be efficient in all operational areas, to gather, evaluate and distribute relevant information before reaching a decision, and to develop effective group processes for good decision-making.

The above principles and the full participation of members enables DALNET libraries to play a leadership role in the delivery of information and to meet research, professional, cultural, and recreational needs of their users and their institutions.
